You're not a citizen here and you don't speak the official language(s). You're waiting to meet a friend.

You're a group of teenagers who are skipping school to attend a climate change protest.

You have a visual impairment and you're in a rush to get to a doctor's appointment.

You don’t have a smartphone and you’re only comfortable using the internet for specific tasks. You’re on your way home.

You're a schoolteacher responsible for taking a class of thirty 12-year-olds on a day trip to a museum.

You're taking your grandmother who has dementia to the park.

You’re stopping for a chat with someone who sleeps on the street on your way to work.

You work for a human rights charity that wants to ensure data collected about people in public spaces is not misused.

You work for the local council and want to understand how organisations are collecting data about the local area.

You're a software engineer who wants to check that sensing equipment in your area is secure.

You're a software engineer who wants to know what datasets are available to use to build a meal-share app.

You're in a wheelchair on your way to the supermarket and you find a sensor that looks broken.

You run a market stall
and are considering the best
place to put your stall.

You're part of a minority religious group on your way to your place of worship.

You're going to a sexual health clinic to find out your results.

You're a city planner in government who wants to use the data collected in this situation to provide better public services.

You're driving your friend to their chemotherapy appointment.

You're a parent with
a baby picking up your
other child from school.

You're coming home from
a night out with some friends
and you're a bit drunk.

You’re out for a morning run
and have your headphones in.
